

# Ashish Gupta

ashug219@gmail.com • +91 9088467250

Web - ashish-gupta03.github.io

LinkedIn: ashishgupta031

## INTERESTS

Machine Learning, Natural Language Processing, Information Extraction, Information Retrieval, Recommender Systems, Reinforcement Learning, Generative AI

## EDUCATION

### M.Tech(CSE) with specialization in Machine Learning

#### ■ IIIT Bangalore

Jul 2016 – Jul 2018

- Thesis: Neural Attention Reader for Video Comprehension
- Adviser: Prof. Manish Gupta
- Focus: Information Retrieval, Information Extraction, Videos, Attention Mechanism, Bidirectional LSTM, Distant Supervision, Differential Weighing

### B.Tech in CSE

#### ■ SRMCEM(Uttar Pradesh Technical University), Lucknow

Aug 2008 – Jun 2012

- Deans List for 3 years.

## RELEVANT EXPERIENCE

### Sharechat

#### ■ Lead ML Engineer

Aug 2022 – Present

- Working in recommendations, personalization, and ranking domains.
- Working on in-session personalization and ranking stack mainly involves creating DAG via Airflow, fetching data from BQ, and using GCS to store and retrieve data.
- Used TF records and built ML models around the TensorFlow stack via distributed training on TPUs.
- Evaluate the model on multiple metrics offline. Add Slack and Opsgenie alerts. Run A/B Tests to evaluate online.

### Microsoft

#### ■ Applied Scientist II

Apr 2021 – Jul 2022

- Worked in the Defensive Ranker team where we needed to rank URLs/documents based on the nature of the threat.
- Ran Interleaving flights, performed A/B testing, and used multiple metrics to measure the performance.
- Developed multi-lingual neural models for the Defensive Search team where we work on specific threats like coronavirus, black lives matter, anti-semitic, suicide, etc. to suppress URLs based on their nature.
- Worked in the creation of a Universal metric measurement set and used multiple Bayesian sampling methods for scaling across different languages and regions

### Walmart Global Tech

#### ■ Data Scientist

Aug 2019 – Apr 2021

- Worked in the Catalog Data Science team.
- Built deep learning models for attribute extraction from text.
- Developed a Smart normalization tool to match the non-standard/junk text present in the catalog to the standard text.
- Developed BERT-based models for classification and sequence labeling in Multi-lingual models. These models are further used in product search.
- Led an initiative to build an auto tagger tool for reducing the amount of tagged data and building efficient models with limited data.
- Worked on jointly leveraging strong supervision data along with weak supervision data to train neural models.
- Lead an initiative on discovering high-quality entities/attributes from Walmart product reviews. This will help to enrich the catalog in a more fine-grained manner.

#### ■ Senior Statistical Analyst

Jul 2018 – Jul 2019

- Worked on retail graph for the home and furniture section, which includes entity extraction, and style prediction. Built models that helped in substitute and complementary product recommendations.

### VideoKen Software Pvt. Ltd, IIIT Bangalore Innovation Centre

#### ■ Visiting Researcher

Jan 2018 – Jun 2018

- Worked on the neural multi-task reader for Video Comprehension. Used Attention Mechanism, Bidirectional LSTM, and self-attention and did meaningful bifurcations of the raw text to complete the task.

### Tata Consultancy Services

#### ■ Data(Systems) Engineer

Nov 2012 – Jun 2016

- Worked in Oracle apps (an ERP tool) as an OTR consultant. Worked on GE Healthcare projects.
- Worked in SCM(Supply Chain Management), Purchase Order, and Order Management modules of Oracle apps.
